Ring Theory.

Alec Zabel-Mena

October 24, 2022

Contents

1 Rings. **5**
- 1.1 Definitions and Examples. . . . 5
- 1.2 Polynomail Rings, Matrix Rings, and Group Rings. . . . 5
- 1.3 Ring Homomorphisms and Factor Rings. . . . 5
- 1.4 Ideals. . . . 5
- 1.5 Rings of Fractions. . . . 5
- 1.6 The Chinese Remainder Theorem. . . . 5

2 Domains. **7**
- 2.1 Eculidion Domains. . . . 7
- 2.2 Principle Ideal Domains. . . . 7
- 2.3 Unique Factorization Domains. . . . 7

3 Polynomial Rings. **9**
- 3.1 Definitions. . . . 9
- 3.2 Polynomial Rings over Fields. . . . 9
- 3.3 Unique Factorization of Polynomials. . . . 9
- 3.4 Irreducibility. . . . 9
- 3.5 Multivariate Polynomail Rings. . . . 9
- 3.6 Gröbner Bases. . . . 9

Chapter 1

Rings.

1.1 Definitions and Examples.

1.2 Polynomail Rings, Matrix Rings, and Group Rings.

1.3 Ring Homomorphisms and Factor Rings.

1.4 Ideals.

1.5 Rings of Fractions.

1.6 The Chinese Remainder Theorem.

Chapter 2

Domains.

2.1 Eculidion Domains.

2.2 Principle Ideal Domains.

2.3 Unique Factorization Domains.

Chapter 3

Polynomial Rings.

3.1 Definitions.

3.2 Polynomial Rings over Fields.

3.3 Unique Factorization of Polynomials.

3.4 Irreducibility.

3.5 Multivariate Polynomail Rings.

3.6 Gröbner Bases.
